WEB DEVELOPER | DATA ANALYST

A developer and data analyst focused on building high-performance, responsive web applications while creating reliable data systems that turn complex information into clear, useful insights. Operating on the principle that user interfaces should be highly engaging, smooth, and easy to navigate, I use technical precision to build smart, real-world automation tools. My objective is to deliver reliable digital solutions driven by data accuracy and user-centered design

EDUCATION

Bachelor of Science in Computer Science
Fatima Jinnah Women Univeristy

CGPA: 3.42/4.00

RESEARCH PROJECTS

Sentimental Academia: Student Evaluation Bias Analysis at FJWU

March 2026 – Present

Worked on survey design, data preprocessing, analytical reporting, and research presentation.

- Applied NLP, thematic analysis, and data visualization techniques on qualitative student feedback.
- Research focused on behavioral analysis and sentiment analysis of student evaluation biases at FJWU.

Degree vs. Skill: Are FJWU Students Truly Job-Ready?

April 2026 – Present

- A Data Analytics Perspective on Skills vs Academic Performance.
- This Academic Research project investigates whether Computer Science students at Fatima Jinnah Women University (FJWU), Rawalpindi are genuinely job-ready beyond their academic performance using survey data.
- The project combines data engineering, statistical analysis, Natural Language Processing (NLP), and an interactive analytics dashboard to produce measurable insights into the skills gap between academia and industry expectations.

PROJECTS

SmartLib – Smart University Library Software | Web & Mobile

PHP & MySQL (Web) | React Native & Supabase (Mobile)

- Implemented book issuance, return tracking, QR code integration, and user authentication.
- Reduced manual library management processes through centralized digital record keeping.
- Designed to improve resource accessibility, reduce manual workload, and promote smart campus initiatives.

Energy Access & PySpark Performance Analysis | Fatima Jinnah Women University

- Designed and executed an ETL pipeline using PySpark and Python to process a 10,000+ record energy access survey dataset, benchmarking distributed vs. single-node computation.
- Conducted comparative performance analysis between PySpark and standard Python (Pandas), quantifying throughput improvements and presenting findings via interactive visual analytics dashboards.
- Applied data cleaning, transformation, and aggregation techniques to extract actionable insights on energy usage patterns across demographics.

AI-Powered Voice Assistant for Campus Navigation

Python | Speech Recognition & Graph Algorithms

- Voice-controlled campus navigation assistant that helps users locate university departments and facilities.
- Integrated speech recognition for user input and text-to-speech (TTS) for system responses, ensuring an interactive experience.
- Applied graph-based shortest path algorithms (like Dijkstra's) for route computation and efficient navigation.
- Designed to assist new students and visitors in exploring campus locations conveniently.
- Speech Recognition, NLP

Text-to-Speech (TTS)

AI Pathfinding using Algorithms

Grocery Management System

Web-based Application | PHP, MySQL, HTML, CSS, XAMPP

- Designed and developed a web-based system to manage grocery store operations including billing, inventory control, customer records, data validation and payment tracking.
- CRUD operations with MySQL for real-time data handling, database management.

PROFESSIONAL EXPERIENCE

SaaS & Web Development Intern | TechCognify Apr 2026 – July 2026

- Contributing to live SaaS applications by engineering scalable frontend architectures and responsive web components.
- Collaborating with development teams to optimize UI/UX layouts and full-stack integration workflows.

Front-End Development Intern | DevelopersHub Corporation Jan 2026 – Feb 2026

- Developed responsive, user-centric web applications while adhering to professional code optimization standards.
- Practiced Agile workflows and version control to collaborate on real-world interface problem-solving.

Campus Ambassador Intern | International Model United Nations (IMUN) Feb 2026 – Mar 2026

- Managed digital marketing and outreach campaigns to drive international conference registrations.
- Designed professional social media assets and carousels to scale community engagement.

TECHNICAL SKILLS

Data Analytics: - Python - Pandas - NumPy - Power BI - Microsoft Excel	Databases: - SQL - MySQL - PostgreSQL - Supabase	Programming: - Python - JavaScript - PHP, - Java & C++	Visualization & Reporting: - Power BI - Excel Dashboards	Tools: - Git & GitHub, - Jupyter Notebook - Google Colab andVS Code
---	---	---	---	--

CERTIFICATIONS

- Certificate of Merit: 7th Annual PGC Science & Robotics Exhibition | Punjab Group of Colleges
- Google IT Automation with Python Specialization
- Google Data Analytics Specialization
- Google Project Management Specialization
- Google Business Intelligence

LEADERSHIP & ENGAGEMENT

Class Representative

- Assisted class fellows in resolving academic and technical issues while coordinating smoothly between students and teachers to arrange meetings.

Digital Marketing & Media Intern | International Model United Nations (IMUN)

- Executed comprehensive digital marketing strategies and designed professional social media carousel assets to maximize global conference reach.
